PROFOLIC

I am a computer programming graduate and a self-developed person in the fields of software and data analysis. I produce projects by combining my technical background with a product development and entrepreneurship perspective. I have a problem-solving-oriented, disciplined and open to continuous learning approach.

PROJECTS

Formül Atölyesi

- I set up an e-commerce system with WooCommerce infrastructure
- I did product development and content management
- I planned the menu and product structure

EXPERIENCE

Intern – Acibadem Hospital

- I observed the system and business processes
- I supported daily operations
- I was involved in coordination within the team

Match Operator & Sports Data Scout | Spordaya Information Technologies Co.

- Analyzing live sports events in real time to manage data streams via advanced data collection systems and operational protocols (RTS & CSA Neo platforms)
- Ensuring operational continuity and data accuracy throughout dynamic, fast-paced decision-making processes.

TECHNICAL SKILLS

- C#, Python, JavaScript, C
- SQL
- HTML, CSS
- WordPress, WooCommerce, Elementor
- Basic UI/UX
